

AKSHAY MURLIDHAR GALE

akshaygale19@gmail.com | +91-7385423874 | [LinkedIn](#) | Nagpur/Wardha, Maharashtra

DevOps Engineer | AWS | Azure | Terraform | Jenkins | Docker | Python

CORE COMPETENCIES

- ❑ CI/CD Automation
- ❑ Infrastructure as Code (Terraform)
- ❑ AWS & Azure Cloud
- ❑ Docker
- ❑ Jenkins
- ❑ GitHub Actions
- ❑ Python Automation
- ❑ Linux Administration
- ❑ Cloud Infrastructure
- ❑ Incident Management
- ❑ Root Cause Analysis
- ❑ Git
- ❑ Deployment Automation
- ❑ Cloud Monitoring

TECHNICAL SKILLS

- ❑ **Cloud Platforms:** AWS (EC2, S3, VPC, IAM), Azure (Azure Container App, Azure Static Web Apps, Microsoft Entra ID)
- ❑ **Infrastructure as Code (IaC):** Terraform
- ❑ **Containerization:** Docker
- ❑ **CI/CD Tools:** Jenkins, GitHub Actions
- ❑ **Artifact and Code Quality:** Jfrog Artifactory, SonarQube
- ❑ **Version Control & Collaboration:** Git, GitHub, GitLab
- ❑ **Monitoring & Logging:** AWS CloudWatch
- ❑ **Scripting & Automation:** Bash, Python
- ❑ **Operating Systems:** Linux, Windows
- ❑ **Networking & Security:** VPC, Route Tables, NAT Gateways, Load Balancers, Security Groups, NACLs
- ❑ **Incident/Ticket Management:** Pagerduty, OpsGeine, Jira
- ❑ **Database:** PostgreSQL

EDUCATION

- ❑ **Bachelor of Engineering in Information Technology** | Nagpur University | 2020

PROFILE SUMMARY

DevOps Engineer with 3+ years of experience in designing and automating cloud infrastructure, CI/CD pipelines, and deployment workflows across AWS and Azure environments. Experienced in Terraform, Jenkins, GitHub Actions, Docker, Python, Bash, and Linux administration. Skilled in Infrastructure as Code (IaC), deployment automation, incident management, Root Cause Analysis (RCA), and production support. Passionate about improving deployment reliability through automation and continuous improvement.

KEY CONTRIBUTIONS

- ❑ **Infrastructure Automation:** Reduced infrastructure provisioning time by implementing Terraform-based Infrastructure as Code, improving deployment consistency and minimizing manual effort
- ❑ **CI/CD Optimization:** Designed and enhanced Jenkins and GitHub Actions pipelines, improving deployment reliability and release efficiency.
- ❑ **Cloud Deployments:** Successfully deployed containerized applications on AWS and Azure using Docker and Azure Container Apps.
- ❑ **Incident Support:** Supported production environments by handling incidents through PagerDuty and OpsGenie and performing Root Cause Analysis.

WORK EXPERIENCE

Feb 2026 – May 2026: Kratin/TruliaCare India — DevOps Engineer

- ❑ Designed and maintained CI/CD pipelines using Jenkins to automate build, testing, and deployment workflows.
- ❑ Managed source code repositories and CI/CD workflows using GitLab and GitHub.
- ❑ Built and managed Docker images and pushed them to Azure Container Registry (ACR).
- ❑ Deployed containerized applications on Azure Container Apps, Azure Static Web Apps, and on-premises Linux servers.
- ❑ Automated deployment activities using Bash and Python scripts, reducing manual deployment effort.
- ❑ Performed application deployments, configuration updates, and release management across development and production environments.
- ❑ Collaborated with development teams to troubleshoot deployment issues and improve release reliability.
- ❑ Configured secure remote access using Apache Guacamole and managed credentials using Passbolt.

May 2025 – Dec 2025: Project Contributor (Freelance Project)

- ❑ Enhanced existing CI/CD pipelines built on GitHub Actions and later migrated them to Jenkins to improve flexibility, control, and customization of build and deployment workflows.
- ❑ Deployed and managed containerized applications on AWS (EC2, S3, IAM), ensuring secure, scalable, and reliable application hosting.
- ❑ Implemented monitoring and alerting using AWS CloudWatch to track application performance and maintain system stability across deployments.
- ❑ Created and maintained technical documentation for CI/CD pipelines, deployment processes, and infrastructure setup to support team reference and knowledge sharing.

CERTIFICATION

- ☐ Microsoft Azure Fundamentals (AZ-900)

Aug 2022 – Aug 2024: cloudEQ — DevOps / SysOps Administrator

Project: McDonald's – Enterprise DevOps

- ☐ Assisted in designing and maintaining **CI/CD pipelines** using **Jenkins** to automate application build, testing, and deployment workflows.
- ☐ Provided operational support for **GitHub**, **SonarQube**, and **JFrog Artifactory**, including user access management, repository administration, troubleshooting, and issue resolution.
- ☐ Assisted in integrating **SonarQube** and **JFrog Artifactory** into CI/CD pipelines to support automated code quality checks and artifact management.
- ☐ Built and managed **Docker** images for containerized applications, ensuring consistent deployments across multiple environments.
- ☐ Assisted in implementing infrastructure automation using **Terraform**, following **Infrastructure as Code (IaC)** best practices.
- ☐ Troubleshoot CI/CD pipeline failures, build issues, and deployment problems to support reliable software releases.
- ☐ Managed production incidents and service requests using **Jira**, collaborating with development and operations teams to resolve issues within SLA.
- ☐ Participated in on-call support using **PagerDuty** and **OpsGenie**, contributing to incident resolution and **Root Cause Analysis (RCA)**.
- ☐ Collaborated with cross-functional teams to support application deployments and continuous delivery activities.

Project: McDonald's – MCD Support

- ☐ Assisted in provisioning and managing AWS infrastructure, including **EC2**, **VPC**, **IAM**, **S3**, **Security Groups** and **Load Balancers**.
- ☐ Configured and maintained secure and scalable cloud environments following AWS best practices.
- ☐ Automated infrastructure provisioning and configuration management using **Terraform**, improving deployment consistency and reducing manual effort.
- ☐ Configured monitoring, alarms, and log management using **AWS CloudWatch** to proactively monitor infrastructure health.
- ☐ Managed Linux servers and performed troubleshooting for infrastructure, networking, and application-related issues.
- ☐ Supported production environments by handling infrastructure incidents, troubleshooting system issues, and contributing to **Root Cause Analysis (RCA)**.
- ☐ Managed **Git** repositories and supported version control workflows for development teams.
- ☐ Created and maintained technical documentation, deployment guides, and operational runbooks for infrastructure and deployment activities.

KEY PROJECTS & CONTRIBUTIONS

☐ GitHub Token Expiry Notification Automation

Role: DevOps Engineer

Designed and implemented a **Python automation script** integrated with **GitHub Actions** to automate GitHub Personal Access Token (PAT) expiry notifications through scheduled email alerts.

Reduced manual monitoring efforts and improved CI/CD reliability by proactively notifying token owners before credential expiration.
