AKSHAY MURLIDHAR GALE

akshaygale19@gmail.com | +91-7385423874 | LinkedIn | Nagpur/Wardha, Maharashtra

DevOps Engineer | AWS | Azure | Terraform | Jenkins | Docker | CI/CD

CORE COMPETENCIES

- ❒ CI/CD Automation
- ❒ Infrastructure as Code (Terraform)
- ❒ AWS & Azure Cloud
- ❒ Docker
- ❒ GitHub Actions
- ❒ Incident Management
- ❒ Deployment Automation

TECHNICAL SKILLS

- ❒ **Cloud Platforms**: AWS (EC2, S3, VPC, IAM), Azure (Azure Container App, Azure Static Web Apps, Microsoft Entra ID)
- ❒ **Infrastructure as Code (IaC)**: Terraform
- ❒ **Containerization & Orchestration:** Docker, Kubernetes
- ❒ **CI/CD Tools**: Jenkins, GitHub Actions
- ❒ **Artifact and Code Quality:** Jfrog Artifactory, SonarQube
- ❒ **Version Control & Collaboration**: Git, GitHub, GitLab
- ❒ **Monitoring & Logging**: AWS CloudWatch
- ❒ **Scripting & Automation**: Bash, Python
- ❒ **Operating Systems**: Linux, Windows
- ❒ **Networking & Security**: VPC, Route Tables, NAT Gateways, Load Balancers, Security Groups, NACLs
- ❒ **Incident/Ticket Management:** Pagerduty, OpsGenie, Jira
- ❒ **Database**: PostgreSQL

EDUCATION

- ❒ **Bachelor of Engineering in Information Technology |** Nagpur University | 2020

CERTIFICATION

Microsoft Azure Fundamentals (AZ-900)

Microsoft Azure DevOps Engineer Expert (AZ-400)-Udemy

Generative AI for DevOps – Udemy

PROFILE SUMMARY

DevOps Engineer with 2+ years of experience in cloud infrastructure, CI/CD pipelines, deployment automation, and production support across AWS and Azure. Hands-on with Terraform, Jenkins, GitHub Actions, Docker, Python, Bash, Linux, incident management, and RCA.

WORK EXPERIENCE

Feb 2026 – May 2026: Kratin software solutions pvt ltd — DevOps Engineer

- ❒ Designed and maintained CI/CD pipelines using Jenkins to automate build, testing, and deployment workflows.
- ❒ Managed source code repositories and CI/CD workflows using GitLab and GitHub.
- ❒ Built and managed Docker images and pushed them to Azure Container Registry (ACR).
- ❒ Deployed containerized applications on Azure Container Apps, Azure Static Web Apps, and on-premises Linux servers.
- ❒ Automated deployment activities using Bash and Python scripts, reducing manual deployment effort.
- ❒ Performed application deployments, configuration updates, and release management across development and production environments.

Aug 2022 – Aug 2024: cloudEQ — SysOps Administrator

Project: McDonald's – Enterprise DevOps

- ❒ Managed and maintained CI/CD pipelines using Jenkins for automated build, testing, and deployment.
- ❒ Supported GitHub, SonarQube, and JFrog Artifactory, including access management, repository administration, and troubleshooting.
- ❒ Integrated SonarQube and JFrog Artifactory into CI/CD pipelines for code quality and artifact management.
- ❒ Built and managed Docker images for consistent application deployments across environments.
- ❒ Automated infrastructure provisioning using Terraform, improving consistency and reducing manual effort.
- ❒ Configured AWS CloudWatch monitoring, alarms, and logs for infrastructure health and troubleshooting.
- ❒ Handled production incidents, service requests, and RCA using Jira, PagerDuty, and OpsGenie.
- ❒ Managed Git repositories and supported version-control workflows for development teams.
- ❒ Created deployment guides, technical documentation, and operational runbooks.
- ❒ Collaborated with development and operations teams to support production deployments and reliable software releases.

KEY PROJECTS & CONTRIBUTIONS

- ❒ **GitHub Token Expiry Notification Automation**
  Role: DevOps Engineer
  Designed and implemented a **Python automation script** integrated with **GitHub Actions** to automate GitHub Personal Access Token (PAT) expiry notifications through scheduled email alerts.
  Reduced manual monitoring efforts and improved CI/CD reliability by proactively notifying token owners before credential expiration.
